Primary Examiner, Art Unit 1641

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant's representative commented that the Arentz-Hansen did not teach the SEQ ID No. 12 and they merely using a 14 mer peptide for their study. Applicant's invention is dependent on the antibody generated by this SEQ ID No. 12. Moreover, Applicant also submitted Xia et al. reference (JACS 206 Vol. 128, page 1859) indicating distinct property of the 14 mer vs. SEQ ID No. 12 (seq 6 vs seq 1 in Table 1). Examiner would reconsider the merits and make decision accordingly. .
